

IBIGBAMI MARVELLOUS

PROFESSIONAL SUMMARY

Highly motivated and detail-oriented recent computer science graduate focused on full-stack development, proficient in data structures and algorithmic complexity. Seeking an entry-level position to apply robust problem-solving methodologies and translate complex requirements into clean, maintainable source code. Proven ability to parse information, conduct effective code reviews, and communicate architectural decisions with technical teams. Eager to contribute to the design, development, and deployment of scalable web applications and user interfaces, leveraging a strong foundation in version control and software development lifecycles (SDLC).

Address: Ibadan, Oyo State.

EDUCATION

Bachelor of Science in Computer Science | 2021-2025

Ekiti State University, Ado-Ekiti, Ekiti State.

Acquired a strong foundational understanding of logical reasoning, critical thinking, software architectures, system governance, API policies, and network protocols. Developed deep analytical skills through qualitative and quantitative research on operating systems, algorithmic efficiency, and legal frameworks governing data privacy. Gained hands-on experience in comparative analysis of programming languages, system evaluation, and technical discourse, with a focus on contemporary issues affecting scalability and security in software development.

- Grade: Second Class Upper division

WORK EXPERIENCE

Full-stack Intern | 6 month of Experience

Applick ICT Academy, Bodija Estate, Oyo State

- Designed and developed functional components for an internal educational platform using a full-stack approach, contributing to both the front-end user interface (UI) and back-end logic.
- Implemented RESTful APIs to facilitate seamless data exchange between the server and client-side applications, improving system responsiveness.

- Gained practical experience with a version control system (Git) and collaborated within an Agile framework to manage code deployment and track feature progress.
- Debugged and optimized database queries and application code, successfully reducing latency and improving overall application performance by X% (e.g., 15%).
- Translated business requirements into technical specifications, demonstrating strong problem-solving and critical thinking skills throughout the Software Development Lifecycle (SDLC).

Freelance Web Development Consultant (Upwork)

Upwork Platform | 6 Months (e.g., Aug 2024 – Jan 2025) | Remote

Engineered responsive front-end interfaces using React and Tailwind CSS, delivering optimal user experiences (UX/UI) across mobile and desktop devices.

Managed the full project lifecycle from initial scope definition and requirement gathering to final deployment, drastically enhancing client communication and project delivery timelines.

Implemented RESTful API integrations to connect custom front-ends with existing client databases, demonstrating proficiency in back-end connection and data serialization.

Utilized Git for version control and agile methodologies to handle iterative changes and client feedback, ensuring code quality and maintainability.

E-commerce Front-End Developer (Fiverr)

Fiverr Platform | Ongoing (e.g., Feb 2025 – Present) | Remote

Optimized loading speeds and cross-browser compatibility for e-commerce sites (Shopify/WooCommerce), resulting in an average 20% improvement in page performance scores.

Wrote, debugged, and refactored JavaScript and jQuery for dynamic content loading and user interaction features, directly enhancing conversion funnels.

Demonstrated strong attention to detail and rapid turnaround on bug fixes, showcasing technical adaptability and effective time management in a fast-paced environment.

Applied SEO-friendly HTML5 and semantic markup practices to all codebases to ensure maximum search engine visibility for clients.

SKILLS AND CERTIFICATION

LOCAL SEO EXPERT

Search Engine Optimization

Due to curiosity and personal interest I develop a specialized knowledge in bringing visibility to business owners website and by so doing, I make sure they get sales from their targeted audience and notable audience.

WEBSITE/APP DEVELOPER

Front-End software Engineer

Skilled in user interface (UI) design. Building scalable web applications using JavaScript frameworks. Creative and results-driven Front-End Developer specializing in architecting responsive, high-performance, and visually appealing web systems. Proficient in custom component and module development, debugging, and optimizing algorithmic efficiency and user experience (UX) to meet client goals and deliver exceptional digital solutions.
